

## Steve Smith's Patented Tiling Method

1. Select desired area with marquee using the fixed size option. Set the size to an exact square.

2. Edit > Copy.

3. File > New. Make the file size close to your selection size.

4. Edit > Paste.

5. Use Image > Canvas Size to crop image to an exact size, such as 3" X 3".

6. Then use Canvas Size to double the image size.

You have this

Change to this

7. Now zoom into the right corner of image to 1600%.

your

8. Edit > Paste. Your selection should appear in the right corner. should be flush with the edge of the original.

The edge

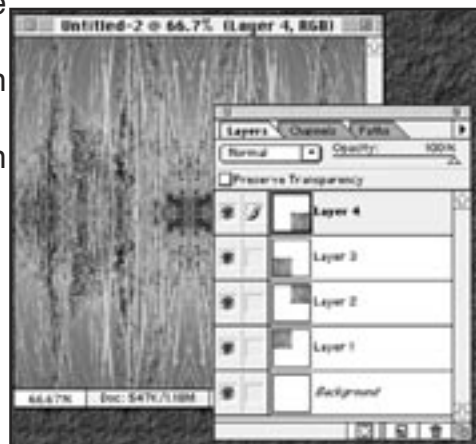

9. Layer > Transform > Flip **Horizontal**.

10. Zoom into the lower left corner of the image and paste again. **Vertical**.

Then Flip

11. Finally, zoom into the right and Flip **Horizontal and vertical**. You will then have four layers.

12. You can now flatten image.
